

POLÍGONOS DEL VALLE DE UCO
SAN PABLO MALBEC 2018

San Pablo, Valle de Uco. Altitude: 1400 mals

POLIGONOS
del Valle de Uco

We make mountain wines. The Andes Range determines the identity of our wines, since it is decisive in the climate, water and soils.

We believe that the Uco Valley is, due to its proximity, the area that best expresses the mountain identity in Mendoza. Since we began to explore its diversity, I was captivated by the austere richness and uniqueness of each of its towns.

Polígonos is the expression of those towns of the Valley. These are wines that make us travel through

those places, through their landscapes, climates and soils. Its grapes come from different places that can be imagined on a map with diverse shapes and edges. A weird geometry as diverse as the sides of a Polygon. As diverse as the wines of each town.

Viticultor

POLÍGONOS DEL VALLE DE UCO SAN PABLO MALBEC 2018

ORIGIN

IG San Pablo, Valle de Uco. Altitude: 1400 mals

SOIL PROFILE

Soils originated in the alluvial fan of the Las Tunas river, on its right bank. Normally sandy loam, of medium depth - between 80 and 120 cm - below which a layer of medium gravel appears covered with calcium carbonate..

HARVEST

It was a warm and dry vintage. These conditions guaranteed the exceptional health of all varieties. The wines show great color and a lot of freshness, characteristics of this season, thanks to the harvest of each plot at its optimum moment.

VINIFICATION

Fermentation with native yeasts, in concrete vessels.
Aging in concrete vessels.

GRAPE

100% Malbec

ALCOHOL

14% vol

TOTAL ACIDTY

5,92 g/l

RESIDUAL SUGAR

1,61 g/l

SEBASTIÁN ZUCCARDI, Viticultor.
